Dr. Guang-Peng Zhou is now a clinical postdoctoral fellow and a resident at the Liver Transplantation Center of Beijing Friendship Hospital, Capital Medical University. Since 2015, he has been under the tutelage of Professor Zhi-Jun Zhu, a famous liver transplant surgeon in mainland China, and has participated in over 100 cases of liver transplantation, including living donor liver transplantation and auxiliary liver transplantation. Under the leadership of Professor Zhi-Jun Zhu, their team completed the first case of cross-auxiliary double domino donor liver transplantation in 2013 and the first case of cross-auxiliary domino liver transplantation by exchange of partial liver between two patients with hypermethioninemia and OTCD in 2018. "Liver transplantation without donation" can be achieved by this way. He is currently engaged in clinical and basic research related to liver transplantation and hepatocyte

transplantation for the treatment of inherited metabolic liver diseases. He has published several scientific research papers in international journals as the first or co-first author and participated in international conferences including IPTA and ILTS as oral or poster abstract presenter for several times. He obtained “Young Investigator Awards” in 2022 Joint International Congress of ILTS, ELITA, & LICAGE.
