

Dear COTS-AST Award Committee,

It is my pleasure to recommend Yadav Suchen Kumar for the COTS-AST award 2023.

As his research project mentor at Seoul National University Bundang Hospital, I have been working closely with him for the past three years. Yadav has actively participated in a research project related to xenotransplantation and innate immunity. He has had a number of responsibilities, including assisting in performing experiments, analyzing data, and writing project reports. He is also responsible for effectively managing the project and presenting research output to different audiences.

I have consistently been impressed with Yadav's attitude, proactivity, determination, and productivity. He is an extremely diligent, organized, courteous, and enthusiastic researcher who consistently demonstrates seriousness and ability to achieve targets and meet tight deadlines, displaying a strong dedication and commitment to excellence.

I am confident that he will devote himself to translational research with a high degree of diligence.

Please do not hesitate to contact me for any further information.

Sincerely,

Jong Cheol Jeong, M.D. Ph.D.
Associate Professor
Department of Internal Medicine (Nephrology),
Transplantation Center
