TTS 2024

30th International Congress of The Transplantation Society (TTS)

Re: Helong Dai, MD, PhD.
Young Investigator Scientific Award
Trainee status

Dear TTS Members:

I write to confirm the eligibility of Dr. Helong Dai for a young investigator scientific award. Dr. Dai is within two years of completion of his clinical training/fellowship as a transplant surgeon in the Department of Organ Transplantation, The Second Xiangya Hospital of Central South University. He is the first and presenting author for his two submitted abstracts entitled “Single-cell RNA sequencing revealed the immunophenotypic features of macrophages in cardiac transplants and uncovered Lgals9 promoted their polarization towards the M2b subtype” and “CD5L binds HSPA5 to up-regulate the activation of TGF- β signaling pathway and promote renal fibrosis”.

Dr. Dai is a member of TTS (Membership ID: 17564) and would greatly benefit from a young investigator scientific award.

I am Dr. Dai's Clinical Training Program Director. Thank you for your support.

Longkai Peng

Longkai Peng, MD, PhD.

Director and Professor, the Department of Organ Transplantation, the Second Xiangya Hospital of Central South University.

Address: No.139 Middle Renmin Road, Changsha, Hunan Province, 410011, China.
