To whom it may concern

Herewith we confirm that Dr. Qiang Zhang works as a trainee in full-time in our Organ Transplant Center, The First Affiliated Hospital, Sun Yat-sen University. And he is definitely within 2 years of completion of his training.

I have known Dr. Zhang and closely worked with him as his supervisor since 2021. He has been working in our Organ Transplant Center and laboratory of Transplantation for more than one year.

As far as I am concerned, Dr. Zhang is an excellent researcher. He is well-trained in scientific work at home and abroad and possesses great clinical and basic medical research capabilities. So, I would like to strongly recommend the application of Dr. Zhang for the Young Investigator Scientific Award at the 12th Congress of the International Pediatric Transplant Association.

Sincerely,

A handwritten signature in cursive script that reads "Wang Changxi".

Wang Changxi, MD, Ph.D
