Re: Rohit George MD

To Whom It May Concern,

I am submitting this letter of enthusiastic support for Rohit George's submission for the Young Investigator Scientific Award. I am the Program Director for the General Pediatric Training Program at University of Texas Health Science Center here in San Antonio where Dr. George is a PGY2 resident in excellent standing in our program, having successfully completed his first year and now performing very well as a second year trainee. He has demonstrated a commitment to excellence, a keen intellect and a drive to grow that is impressive. He has an innate likeability and a strong sense of purpose and intent that are genuine and refreshing. Additionally, his personal demeanor, work ethic and thoughtful decision making have been consistent strengths throughout his training. We have been thrilled with his performance, his engagement and his skills as a pediatric resident. Rohit is an approachable and enthusiastic learner, a fantastic role model to his peers and an inquisitive trainee. I am excited to see him continue to expand his skill set and learning through his submission of this abstract and his exploration of opportunities to present this work. I have seen his leadership skills evolve and his transition to supervisory roles as a PGY2 has been seamless, high performing and predictive of the great success I know he will enjoy as he continues his training with us and beyond as a fellow. He has been an exemplary trainee in meeting all requirements and is an administrative star with timely and thorough responsiveness to all requests and requirements.

Dr. George has the full and enthusiastic support of this program and this program director to apply for the Young Investigator Scientific Award and I will commit to ensuring he is able to fully participate and attend as presenting author to the International Pediatric Transplant Association Conference in March of 2023 should he be honored with acceptance. Please contact me should you have any additional questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "M Arandes", written in a cursive style.

Michelle Arandes, MD

Residency Training Director
Professor of Pediatrics
Pediatric Hospitalist
